ABSTRACT

A report by the Council of Ontario Universities provides a 10-year review of the revenue and expenses of universities in Ontario. Information is derived from an annual publication entitled "Financial Report of Ontario Universities." The policy environment as well as revenues and expenses are discussed. An overview identifies major trends (using both narrative and tables) including a policy environment characterized by an expanding economy, changes in the distribution of both revenues and expenses, and substantial differences among institutions in revenues and expenses. Adjustments to the data to improve comparability are briefly noted . The major portion of the document provides financial information in tabular form with sections which focus on: (1) enrollment and basic income units for each university on a consolidated basis; (2) summary information for all universities and affiliated and federated colleges on a consolidated basis; (3) sources of revenue for each university; (4) objects of expense for each university; and (5) financial information for each affiliated and federated college. A DECADE OF FINANCIAL INFORMATION
ONTARIO UNIVERSITIES
1978-79 TO 1987-88

OVERVIEW

This publication presents a 10-year review of the revenue and expenses of universities in Ontario. Information contained in this document is derived from an annual publication, entitled the *Financial Report of Ontario Universities*, which in turn is made possible by an annual collection of financial information by the Council of Finance Officers - Universities of Ontario (COFO-UO). Revisions, to the information collected annually, have been made to enhance consistency both between institutions and from year to year. Those revisions are identified in the "Notes of Caution" section which follows.

THE POLICY ENVIRONMENT

University finances in Ontario should be viewed within the context of the policy environment which exists in the province. That policy environment, between the fiscal years 1978-79 and 1987-88, can be characterized as one involving strong economic growth and correspondingly heavy demand on Ontario universities. The following table, entitled 'Socio-Economic Indicators' demonstrates the strength of that economic growth and the basis for some of those demands.

During the decade between 1978-79 and 1987-88, the economy of Ontario, as measured by the province's gross domestic product, expanded by 143%. Personal incomes grew by 146%. These are significantly higher rates of expansion than inflation (84% as measured by the consumer price index) and population growth (10% increase).

An expanding economy has meant an increased ability, on the part of the Ontario government, to finance its expenditures. Provincial government expenditures grew by approximately 146% between 1978-79 and 1987-88, about the same rate of growth as the provincial economy.

(2) Ministry of Treasury and Economics, Ontario Budget, various years.
(3) Bank of Canada Review.
(4) Ministry of Treasury and Economics, Public Accounts of Ontario, various years.
(5) Statistics Canada, All Canada, adjusted to the Ontario university fiscal year May 1 to April 30.

Note: Provincial Personal Income and Provincial Government Budgetary Expenditures are stated in constant dollars by using the Consumer Price Index, Gross Domestic Product is stated in constant dollars by using the GDP implicit price deflator.

As can be seen in Section 1 of this publication, enrolment has increased between 1978-79 and 1987-88 by 38,849 full-time equivalent undergraduates and 2,862 fte graduate students. These additional 41,711 students, represent a 23% increase over the past decade. This increase is more than the number presently registered at the University of Toronto, the province's largest post-secondary institution. As Figure 1 illustrates, these increases have been greater at the undergraduate level (23% increase) than at the graduate level (up 16%). Basic income units have increased by 22%, 23% at the undergraduate level and 19% at the graduate level.

REVENUES AND EXPENSES

University finances have reflected this policy environment both by an expansion of and by a reallocation of total resources. Section 2 of this publication examines the combined revenues and expenses of the 43 universities and affiliated and federated colleges in Ontario. The pattern of total university and college revenues, from all sources, has altered significantly. As can be seen in Figure 2, while grants of all types from the provincial government have declined from almost 63% of total revenue in 1978-79 to 56% of total revenue in 1987-88, universities and affiliated colleges have increased their reliance on federal government grants (mostly for sponsored research activity), gifts, donations and grants from the private sector, and tuition fees.

The changing pattern of university revenues is reflected by the significantly different rates of growth of the various university funds. After adjusting for inflation, Figure 3 demonstrates that the constant dollar value of operating fund expenses increased by only 9%, while non-credit expenses increased by 92%, ancillary enterprises by 42%, sponsored research by 48%, trust and endowment by 92%, and capital expenses by 62%.

Within the operating fund, from which most instruction and non-sponsored research is financed, Figure 4 shows that the relative importance of grants from the Ontario government has declined from over 80% to less than 78%. At the same time, the relative importance of fees collected from students has increased from 14% to 18% of the total revenue. In fact, as shown in Figure 5, tuition fees, miscellaneous fees, and investment income all have grown much faster than provincial grants.

As well, the types of provincial grants being received have been altered quite significantly. For example, formula grants have declined from almost 78% of total operating revenue to slightly more than 69%. Extra formula grants, other grants from the Ministry of Colleges and Universities, and grants from

other Ministries of the Ontario government have increased from less than 3% of operating revenue to more than 8%.

Figure 6 shows that within the sponsored research fund, the federal and provincial governments both have significantly increased their financial support, but gifts, donations and grants from the private sector have grown much faster, in percentage terms, than has support from either level of government. The provincial government's share of sponsored research revenue has actually declined, from 18% to 16%, while the federal government's share has increased from 52% to 54%. Gifts, donations and non-government grants have increased from 20% to 25% of total sponsored research revenue.

Within the trust and endowment fund, provincial government grants and contracts, federal government grants and contracts, and gifts, donations and non-government grants all increased by significant amounts. Within the capital fund, borrowings and grants from both the federal government and from the Ministry of Colleges and Universities have grown considerably. Grants from provincial government ministries other than MCU have declined.

In total, universities and colleges now rely less on provincial government grants, particularly formula grants. In 1978-79, these formula grants contributed almost 57% of total university revenue, by 1987-88 they contributed less than 46% of the total. Some of this change has resulted from a shift to extra-formula and other MCU grants - funding which is usually tied to specific purposes and government objectives. Much of the change, however, reflects additional funding from tuition fees, federal government grants and contracts, and gifts, donations and non-government grants.

The relative distribution of university expenses has remained fairly constant over the past decade. As Figures 7 and 8 illustrate, there have been no major shifts of spending patterns within the operating fund. Compared to the other functional categories, physical plant expenses have declined in importance and several objects of expense have declined in significance - salaries and wages, equipment and furniture rental, utilities, municipal taxes, renovations, alterations and repairs, and externally contracted services.

Equipment and furniture purchases, operational supplies and expenses, scholarships and bursaries and library acquisitions have increased in significance over the 10 year period. Library acquisition expenses increased more than the general rate of inflation, but not more than the costs of books and periodicals purchased by universities. For example, by 1987-88 the Consumer Price Index had increased by 84.2% over 1978-79, but the average cost of books and periodicals purchased by university libraries had increased

by 148.1%. By 1987-88, the constant dollar value of library acquisitions had declined 13% from the amount spent in 1978-79.[1]

INSTITUTIONAL COMPARISONS

These financial data also make possible comparisons between universities over the 10-year period between 1978-79 and 1987-88. In sections 3 and 4 of this publication, it can be seen that operating revenue increased by the greatest amounts at the University of Toronto, York University, and the University of Western Ontario. However, these are also the largest universities in the province and much of this increase will be offset by inflation. The greatest increases, in percentage terms, were those at Nipissing University College, Brock University, and York. These increases are largely reflected in formula grant and tuition fee revenue.

Sponsored research revenues and expenses increased by the greatest amounts at Toronto, Western Ontario, McMaster University and the University of Waterloo. In percentage terms, they went up the most at Wilfrid Laurier University, Nipissing, Ryerson Polytechnical Institute, Waterloo, and Lakehead University, but of these institutions only Waterloo was among the larger recipients of sponsored research revenues. The cost of salary expenses for faculty holding academic rank experienced a real increase (i.e. in constant dollars) of about 44% while other salaries and wages increased 63% in constant dollar terms between 1978-79 and 1987-88. Equipment and furniture purchases out of sponsored research funds more than doubled in value, even after accounting for inflation, and operational supplies and expenses increased by 41%, in constant dollar terms.

Trust and endowment revenue grew much faster than inflation with the greatest increases achieved by Toronto, McMaster University and Queen's University. Expenses increased by 85%, in constant dollar terms, between 1978-79 and 1987-88. Salaries and wages and scholarships and bursaries were major components of those increased expenses.

Capital revenue also kept well ahead of inflation with the largest gains made by Toronto. This reflects a policy of increased capital grants from the Ministry of Colleges and Universities. Waterloo also benefited significantly by added grants from this source. Capital grants from Ontario ministries

other than MCU became of major importance in the early 1980's, but in recent years their value has declined to a negligible amount. Gifts, donations and non-government grants to the capital fund have not grown faster than inflation at most institutions.

Equipment and furniture purchases, out of capital funds, were greatest over the 10-year period at Waterloo, Toronto, and Ryerson. Renovations, alterations and repairs more than doubled, in constant dollar value, with the greatest increases in expenses at Queen's, Toronto, and Windsor. Building expenses also fluctuated dramatically from year to year, but over the decade the largest building programmes were carried out at Toronto, Ottawa, Waterloo, and Queen's.

AFFILIATED AND FEDERATED COLLEGES AND UNIVERSITIES

Among the 22 affiliated and federated church-related colleges and universities examined in Section 5, operating revenues collected by most affiliated colleges grew more quickly than inflation, particularly at Thorneloe University, Regis College and St. Paul's United College. On the other hand, revenues actually declined at St. Augustine's Seminary and failed to keep up with inflation at Huntington University, the University of Sudbury, Queen's Theological College, Trinity College, Wycliffe College, St. Jerome's College, Brescia College, and Dominicain College.

Most colleges' ability to rely on provincial government grants, particularly formula grants, declined considerably over the 10-year time span. Tuition fees, gifts, donations and non-government grants, and miscellaneous income all became more important.

Affiliated colleges' expense patterns also shifted during the course of this decade. Operating expenses for salaries paid to faculty with academic rank and for employee benefits declined. Non-salary expenses, particularly for renovations, alterations and repairs; library acquisitions; equipment and furniture purchases; operational supplies and expenses; and municipal taxes all increased in significance at most colleges.

Ancillary enterprises' revenue grew more quickly than inflation with the fastest rates of increase at most colleges resulting from increases in miscellaneous fees (mostly room and board charges to students in residences) and, to a lesser extent, increased gifts, donations and non-government grants.

Trust and endowment revenues also increased faster than inflation, largely because of major increases in revenue from investment income and gifts, donations and non-government grants. Capital revenues were most significant, over the 10-year time span, at St. Augustine's, Université Saint-Paul, Knox College, and Trinity.

NOTES OF CAUTION

The Council of Finance Officers - Universities of Ontario has agreed to provide a 10-year review of the financing of Ontario universities covering the fiscal years 1978-79 through 1987-88. The 10 years of information contained in this document are based upon the annual publication currently entitled the *Financial Report of Ontario Universities.*

HISTORICAL ADJUSTMENTS

In order that these 10 years of financial information can be presented in a meaningful fashion, several adjustments are necessary to both the statements of revenue and the statements of expense. Among the adjustments made to the statements of university revenue are the following:

- grants from governments other than those from the province of Ontario, municipal governments, or the federal government are included in miscellaneous revenue;

- donations are reported together with non-government grants and contracts; and

- interfund transfers are not reported at all.

In addition, it should be noted that revenues from sales of services and products are restricted to ancillary enterprises, except during the first two years of data reported.

Among the adjustments made to the statements of university expenses are the following:

- equipment maintenance expenses are included in operational supplies and expenses; and

- municipal taxes are reported in the physical plant function in every year.

In addition, it should be noted that internal cost allocations out of the physical plant function are possible during the first year of information, but not thereafter.

Users of this information should also be aware that, from time to time, individual universities and colleges will make adjustments to the financial information which they report to COFO-UO. For example, in 1982-83 the University of Toronto made significant revisions to the format of its financial statements. This had a major impact on the reporting to COFO-UO of their non-credit and ancillary enterprises revenues and expenses. The magnitude of the adjustments to the financial information which institutions report to COFO-UO can only be determined by consulting the institution involved.

FINANCIAL YEAR ENDS

In those years covered by this volume, most universities and colleges reported financial information for the 12 months ending the 30th day of April of each year. Several institutions reported information for 12 months but, each year, employed the following fiscal year ends:

Ontario College of Art	May 31 of the same calendar year
Ryerson Polytechnical Institute	March 31 of the same calendar year
McMaster Divinity College	December 31 of the preceding calendar year
Knox College	December 31 of the preceding calendar year
Victoria University	May 31 of the same calendar year

Three institutions employed a longer or shorter fiscal year at one point which enabled them to alter their fiscal year ends:

Queen's Theological College	16-month fiscal year between 1 January 1978 and 30 April 1979 changed the fiscal year end from December 31 to April 30.
Regis College	9-month fiscal year between 1 August 1979 and 30 April 1980 changed the fiscal year end from July 31 to April 30.
Wycliffe College	14-month fiscal year between 1 April 1981 and 31 May 1982 changed the fiscal year end from March 31 to May 31.

GENERAL CAVEATS

Users of these data should be aware of several general caveats which the Council of Finance Officers - Universities of Ontario wish to emphasize.

These general caveats specify that certain of the summary data in this report are subject to interpretation or clarification because of inherent differences among institutions in academic programmes, organization, physical environment, management philosophy and budgetary and accounting procedures.

They also specify that financial information reported by the affiliated and federated colleges and universities (shown in Volume II of each year's *Financial Report*) cannot be added to the financial information reported by the universities (shown in Volume I of each year's *Financial Report*) without certain adjustments. The consolidated summary tables reflect these adjustments.

INSTITUTIONS INCLUDED

The following are two lists of institutions which are included in this report. The first list consists of institutions which are eligible to claim financial support directly from the provincial government:

Brock University
Carleton University
University of Guelph
Lakehead University
Laurentian University
Algoma University College
Nipissing University College
Le Collège Universitaire de Hearst
McMaster University
Ontario College of Art
Ontario Institute for Studies in Education
University of Ottawa
Queen's University
Ryerson Polytechnical Institute
University of Toronto
Trent University
University of Waterloo
University of Western Ontario
Wilfred Laurier University
University of Windsor
York University

The following institutions are church-related and are federated or affiliated with universities identified above. Operating support is claimed by the universities identified above for eligible enrolment in the following church-related institutions (university affiliation in brackets):

Huntington University (Laurentian)
University of Sudbury (Laurentian)
Thorneloe University (Laurentian)
McMaster Divinity College (McMaster)
Univérsitè St-Paul (Ottawa)
Queen's Theological College (Queen's)
Knox College (Toronto)
Regis College (Toronto)
St. Augustine's Seminary (Toronto)
University of St. Michael's College (Toronto)
University of Trinity College (Toronto)
Victoria University (Toronto)
Wycliffe College (Toronto)
Conrad Grebel College (Waterloo)
Renison College (Waterloo)
University of St. Jerome's College (Waterloo)
St. Paul's United College (Waterloo)
Brescia College (Western Ontario)
Huron College (Western Ontario)
King's College & St. Peter's Seminary (Western Ontario)
Waterloo Lutheran Seminary (Wilfred Laurier)
Le Collège Dominicain

Readers should also be aware that St. Augustine's Seminary was affiliated initially with the University of Ottawa but, beginning with the fiscal year ending 30 April 1985, became affiliated with the University of Toronto.
